## PROJECTS

**EatVite** — Web App that allows users to send an “eatVite” to their indecisive friends with pre-chosen restaurants that calls to a yelp API.

Javascript | React | MongoDB/Mongoose | Node.j | MernAuth

GitHub: <https://github.com/tinnerrss/EatVite>

**Closet** — Web App that allows users to upload photos of items in their closet so they can keep inventory of what they own and plan out what to wear.

Python | React | Node.js | Flask | FlaskSQL | OAuth | RESTful APIs

GitHub: <https://github.com/tinnerrss/closet>

**Vanity** — Web App that draws from a Makeup API and allows users to search through makeup products and add them to their vanity.

Utilizes Javascript, React, MongoDB, Mongoose, Node.js, MernAuth, RESTful APIs

GitHub: <https://github.com/tinnerrss/vanity>

## EDUCATION

### General Assembly, Seattle, WA

JANUARY 2020 - APRIL 2020

A 13 week full-stack web development immersive program covering modern in-demand programming technologies and fundamentals in Computer Science.

## EXPERIENCE

### Tin & Lash, Seattle, WA — Business Owner

MARCH 2017 - APRIL 2020

Managed payroll, scheduling, and restocking of inventory. Held training classes for employees and technicians nationwide in eyelash extensions and permanent cosmetics. Continuously learn new industry techniques and stay updated with safe & sanitary guidelines.
